Never played? Here's how it works:

There are 100 squares available. Purchase as many squares as you like. When all squares are sold, owners' names will be placed on the board randomly. After all names are placed, the numbers 0-9 will be positioned along the top and the side, also randomly. Copies of the completed board will be made available.

The last digit in both teams' scores at the end of the game will determine the winning square. In basketball, there are no "bad numbers" so every square is good!

Now watch the games and see if you win!
